WORK EXPERIENCE

CrowdWisdomTrading | AI Intern (CrewAI / LLM)

Jan 2026 – Apr 2026

- Designed **multi-agent AI pipelines** using CrewAI for automated market intelligence, reducing manual research time by **40%**.
- Engineered **RAG pipelines and LLM orchestration** for automated research and signal validation across 3+ use cases.
- Built scalable **agent-based systems** with prompt engineering and LLM inference for real-time trading insights.

HOSHŌ DIGITAL | Jr. Technical Consultant – Intern

Jul 2025 – Dec 2025

- Engineered automated **data pipelines** using Power Apps and .NET, cutting manual reporting by **30%** and process time by **25%**.
- Built **Power BI dashboards** surfacing KPIs for 2+ business units, replacing ad-hoc spreadsheet reporting.
- Delivered **data analysis and automation solutions** using .NET 8 and Power Platform for 3 client accounts.

KEY PROJECTS

Query System (RAG-based Q&A) 🔄

Jan 2025 – Feb 2025

- Built a **FastAPI-based semantic Q&A system** over uploaded documents using LLMs, supporting **1k+ queries/day** with low latency.
- Engineered a modular 4-stage pipeline (embedding → semantic search → LLM inference → synthesis) enabling independent upgrades at each stage.

Arrhythmia Beat Classification 🔄

Jun 2024 – Aug 2024

- Trained ML classification models on the **MIT-BIH Arrhythmia dataset** (100k+ samples), achieving **95.5% accuracy** validated by precision, recall, and F1-score.
- Applied **wavelet transformation** and advanced signal preprocessing to extract noise-robust features from ECG data.

Player Re-Identification System 🔄

Feb 2025 – Apr 2025

- Developed a real-time **multi-object tracking system** using **YOLOv11** (detection) and **DeepSORT** (re-ID), achieving **95%+ ID recovery accuracy** post-occlusion.
- Reduced identity mismatches by **30%** by implementing adaptive bounding box logic, improving tracking consistency across game scenarios.

Retail Sales Analysis 🔄

Jun 2024 – Jul 2024

- Performed **EDA** on 50k+ retail transactions using Python and Jupyter, identifying customer segments, sales trends, and seasonality patterns.
- Improved demand forecasting accuracy by **20%** and enabled a **15% increase** in targeted sales strategies through statistical analysis and actionable insights.

MemberRewardsApi 🔄

Mar 2025 – May 2025

- Designed and deployed a **RESTful API** in **.NET 8** managing memberships, reward points, and coupon redemptions, handling **10k+ API requests/day**.
- Implemented secure **CRUD operations**, JWT authentication, and structured endpoints enabling seamless third-party integration.

TECHNICAL SKILLS

- Languages:** Python, SQL, C#
- ML / AI:** PyTorch, TensorFlow, Scikit-learn, XGBoost, LangChain, OpenCV, YOLOv11, DeepSORT, SHAP, Optuna, MLflow, MLOps
- LLM / GenAI:** RAG, Vector Search, Prompt Engineering, LLM Orchestration, CrewAI, Multimodal RAG, Embeddings
- Data & Viz:** Pandas, NumPy, Power BI, Microsoft Fabric, BigQuery, Streamlit
- Backend & Infra:** FastAPI, .NET 8, Docker, GCP, Airflow, Prefect, n8n, Git, GitHub, API Integration, Webhooks

CERTIFICATIONS

- Google Data Analytics Specialization – Coursera
- Google Cloud: Prompt Design in Vertex AI
- Multimodality and Multimodal RAG – Google Cloud
- Gemini and Imagen – Google Cloud
- NPTEL Elite – Fuzzy Sets, Logic and Systems & Applications (IIT Kanpur, 2025)

ACHIEVEMENTS & HACKATHONS

- Finalist**, Hacksagon 2025 – National-level hackathon organized by ABV IITM Gwalior
- Represented team at **Google Developer Group Solution Challenge 2025**; built an AI-based healthcare access application
- Competed in **Colosseum Breakout Hackathon**, powered by the Solana Foundation

EDUCATION

B.Tech, Electronics & Telecommunication — Madhav Institute of Technology & Science, Gwalior

2022 – 2026

CBSE Class X & XII — Annie Besant School, Indore

2020 - 2022
